## BUILDING BLOCKS AND NUTRITION

### Tell It Again!™ Flip Book

## Tell It Again! Flip Book Introduction

This *Tell It Again! Flip Book* contains images that accompany the *Tell It Again! Read-Aloud Anthology for The Human Body: Building Blocks and Nutrition*. The images are in sequential order. Each image is identified by its lesson number, read-aloud letter (A or B), and the number of the image within the particular read-aloud. For example, the first image in Read-Aloud 1A is numbered 1A-1. Once you have worked your way through the book to the last page, you will flip the entire book over to view the second half of the images.

Depending on your classroom configuration, you may need to have students sit closer to the flip book in order to see the images clearly.

## ACKNOWLEDGMENTS

These materials are the result of the work, advice, and encouragement of numerous individuals over many years. Some of those singled out here already know the depth of our gratitude; others may be surprised to find themselves thanked publicly for help they gave quietly and generously for the sake of the enterprise alone. To helpers named and unnamed we are deeply grateful.

## CONTRIBUTORS TO EARLIER VERSIONS OF THESE MATERIALS

Susan B. Albaugh, Kazuko Ashizawa, Nancy Braier, Kathryn M. Cummings, Michelle De Groot, Diana Espinal, Mary E. Forbes, Michael L. Ford, Ted Hirsch, Danielle Knecht, James K. Lee, Diane Henry Leipzig, Martha G. Mack, Liana Mahoney, Isabel McLean, Steve Morrison, Juliane K. Munson, Elizabeth B. Rasmussen, Laura Tortorelli, Rachael L. Shaw, Sivan B. Sherman, Miriam E. Vidaver, Catherine S. Whittington, Jeannette A. Williams

We would like to extend special recognition to Program Directors Matthew Davis and Souzanne Wright who were instrumental to the early development of this program.

## SCHOOLS

We are truly grateful to the teachers, students, and administrators of the following schools for their willingness to field test these materials and for their invaluable advice: Capitol View Elementary, Challenge Foundation Academy (IN), Community Academy Public Charter School, Lake Lure Classical Academy, Lepanto Elementary School, New Holland Core Knowledge Academy, Paramount School of Excellence, Pioneer Challenge Foundation Academy, New York City PS 26R (The Carteret School), PS 30X (Wilton School), PS 50X (Clara Barton School), PS 96Q, PS 102X (Joseph O. Loretan), PS 104Q (The Bays Water), PS 214K (Michael Friedsam), PS 223Q (Lyndon B. Johnson School), PS 308K (Clara Cardwell), PS 333Q (Goldie Maple Academy), Sequoyah Elementary School, South Shore Charter Public School, Spartanburg Charter School, Steed Elementary School, Thomas Jefferson Classical Academy, Three Oaks Elementary, West Manor Elementary.

And a special thanks to the CKLA Pilot Coordinators Anita Henderson, Yasmin Lugo-Hernandez, and Susan Smith, whose suggestions and day-to-day support to teachers using these materials in their classrooms was critical.

through many vessels, washing, dressing, and drying, as the parts of some little creatures being like the digestive bodies in the lower parts, and when these have another form, as the little exuviae, which I consider when I look upon the little of nature, in placing in Animals such a kind of covering, as they are supplied by the materials conveyed to the stomach, and passing the Animal of the lungs, and in contributing the most adequate fibres, and instrumental in the procuring and collecting of these fibres, so that and chevell is full, which indeed seems to be the principal end of all the contrivances observable in most Animals.

Observ. LIII. Of a Flea.

The strength and beauty of this small creature, had it no other relation at all to man, would deserve a description. For its strength, the *Asterops* is able to make no greater discovery of it than the naked eye, but surely the curious contrivance of its legs, as no other creature. I have yet observ'd, has any thing like it; for the joints of it are so adapted, that he canas (were fold them short one with another, and suddenly stretch or spring them out to their whole length, and B. within C. parallel to, or side by side each other, but within the out. F. two parallel also, but the parts of the hinder legs, G. H. and I. like the foot, leg, and thigh of a man, those six legs be clincked up together, and when he leaps, springs them all out, and thereby exerts his whole strength at once.

But, as for the beauty of it, the *Asterops* manifests it to be all over adorn'd with a curiously polish'd suit of plate Armour, neatly jointed, and beset with multitudes of sharp pins, that almost like Porcupine, are rib'd with a quick and round black eye K, behind each of which appears a small cavity, L, in which he seems to move to and fro, a certain thin film beset with many small transparent hairs, which probably may be his ears; in the forepart of his head, between the two fore-legs, he has two small long jointed feelers, or rather smellers, M M, which have four joints, and are hairy, like those of several other creatures; between the feeler, it has a small *proboscis*, or *probe*, N N O, that seems to consist of a tube.

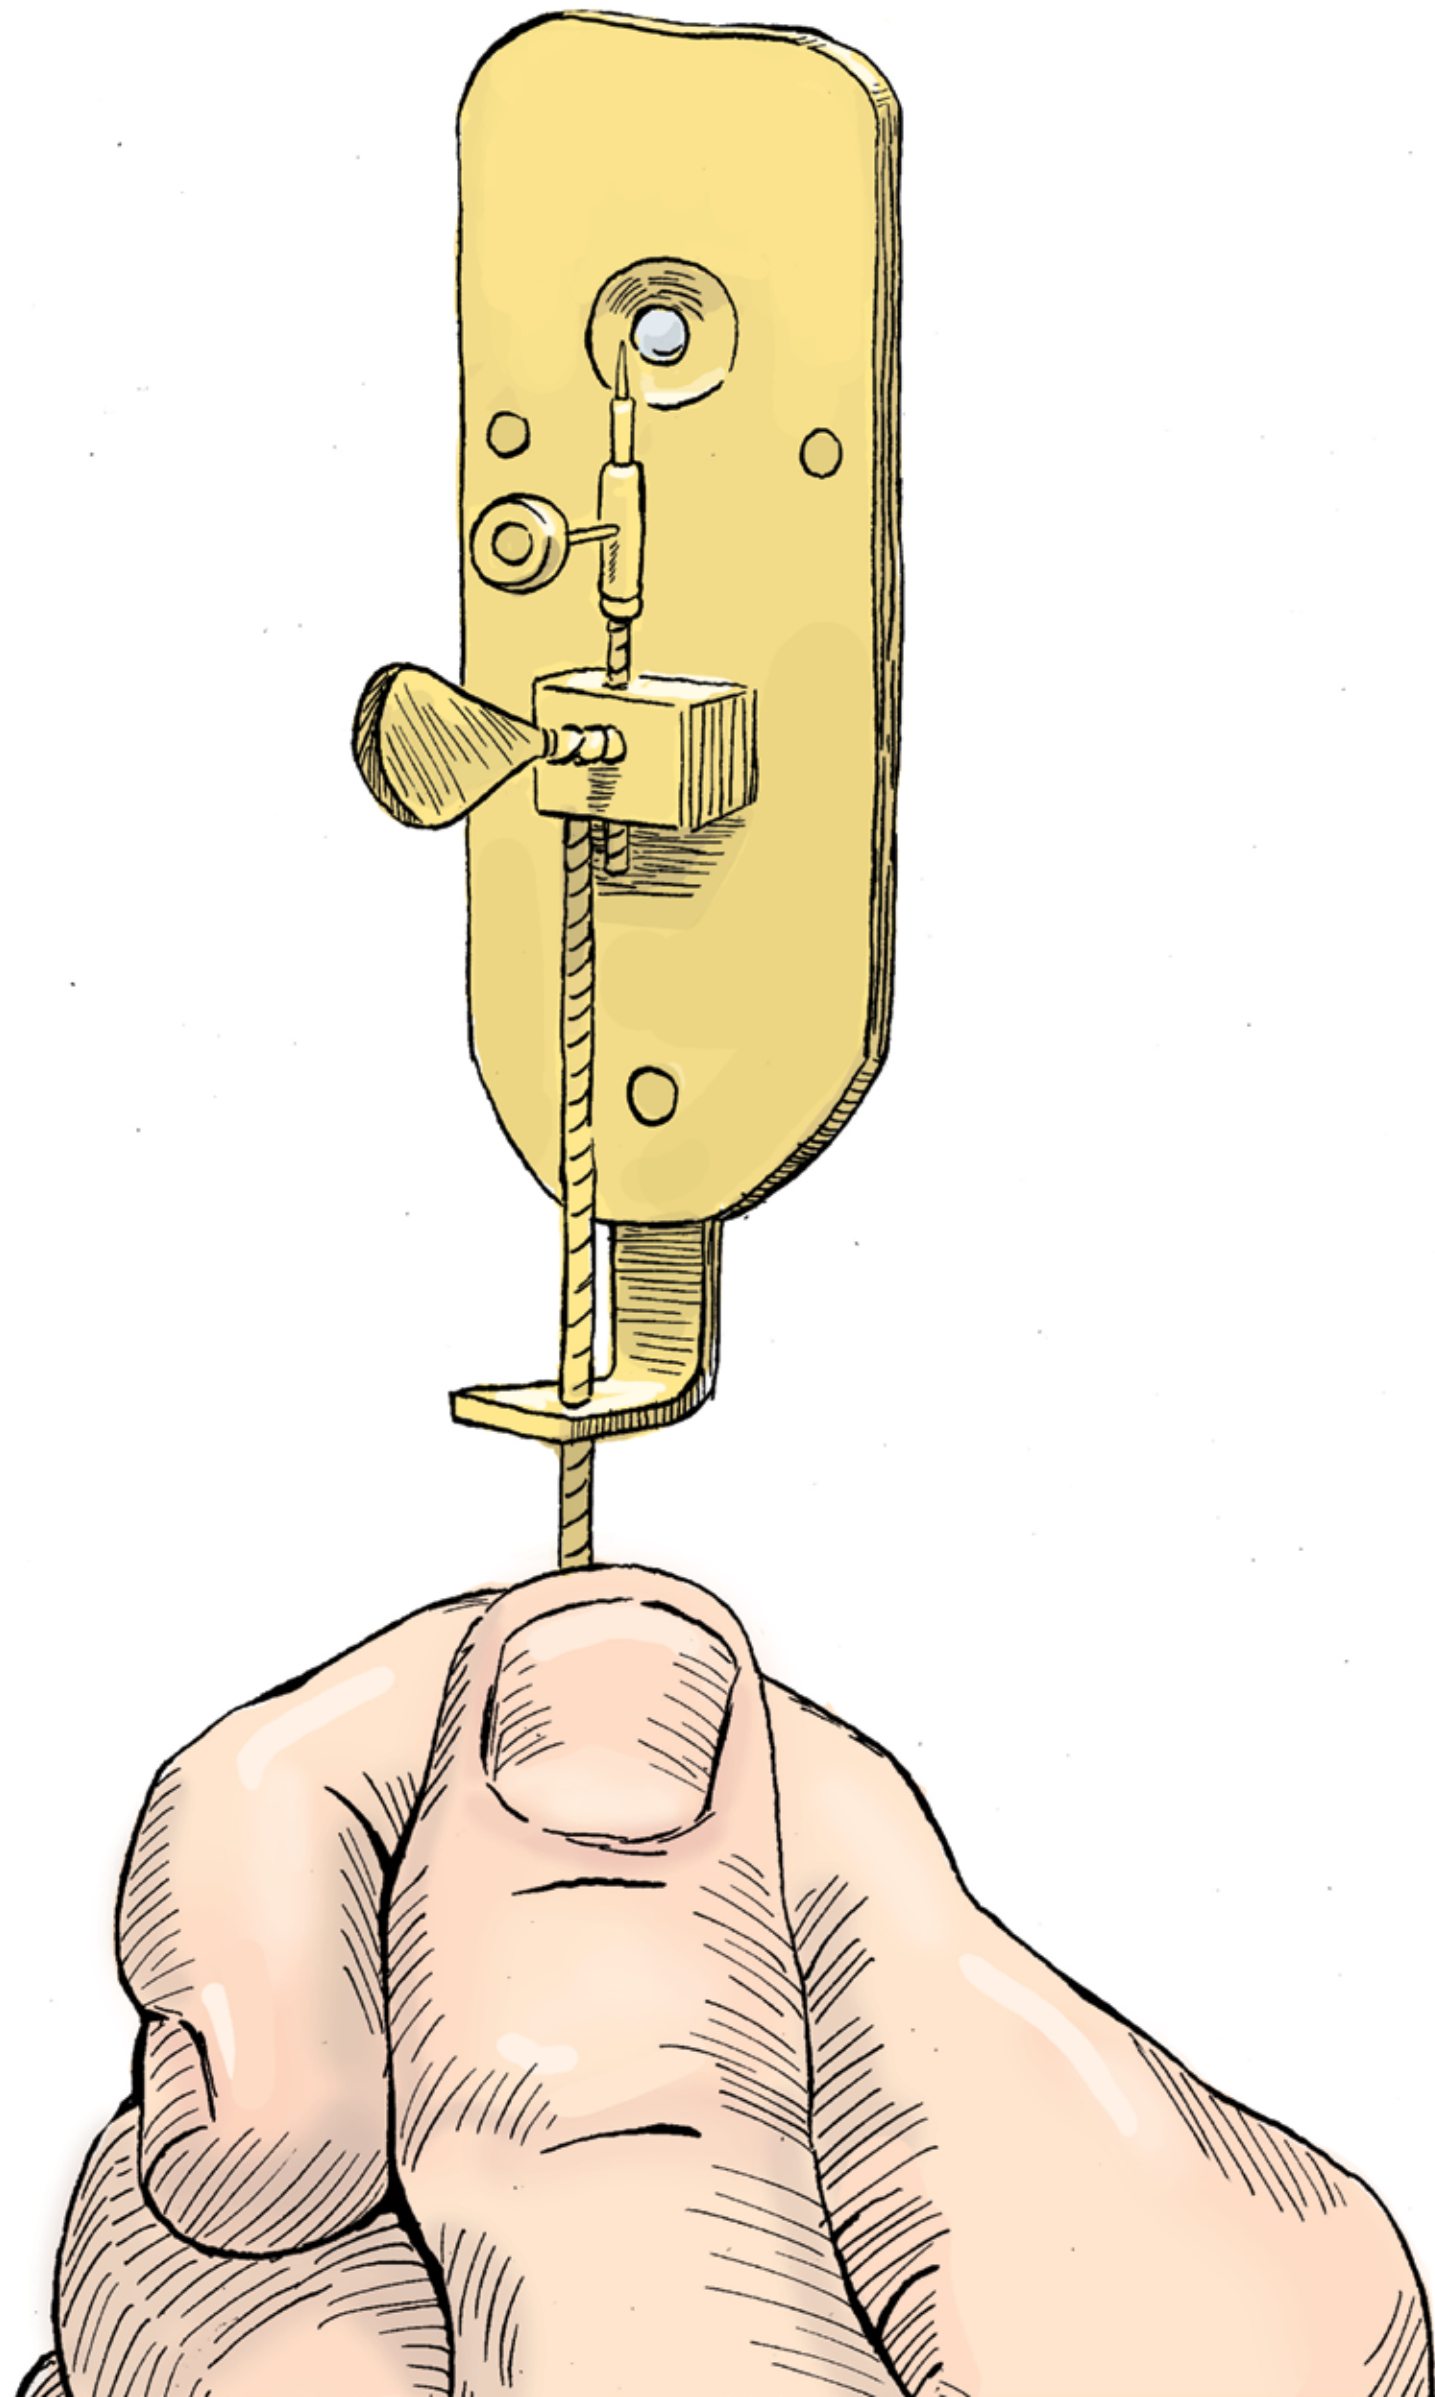

primo prodeuntem vermem ope fortis alicujus gummi particulae cuidam aris agglutinavi; atque ita eum microscopio opposui & pictori tradidi, ut quantum pote accurate vermem quem videret, delinearet, vermibus enim vehementissime sese movebat.

Fig. 1. ABC. representat vermem supinum aeri agglutinatum, & ita etiam hic delineatum. A. est caput, in quo duae partes instar cornuum prominent, ex quibus adhuc tam exiguae prominunt partes, ut pictor eas non nisi monitus videret, inter haec coenua duae breviores apparent partes prominentes, quae non in capite sunt, sed in ejus parte inferiori, ubi os est; his vero partibus in progressu utitur vermibus, & similiter etiam partibus in parte postica corporis C. delineatis.

Postquam hic vermibus erat depictus, tam vehementer laborabat, ut e gummi decideret, tum eum iterum ope gummi partis arcae cuspidi agglutinavi, quod tamen tam leviter agere non potui, quin aliqua gummi parte attingerem vermibus caput, quod maxime ei nocere vidi, & quando ei parti per 6. horas fuerat agglutinatus, moriebatur; paulo post vidi omnem humorem ita ex corpore ejus exhalare, ut vario modo contraheretur, & post viginti quatuor horas hujus vermibus corpus praeter ariditatem ita erat contractum, ut vermibus non amplius referret, ubi e contra alius vermibus, qui duas horas post priorem ex ovo erat exclusus, & per duas tantum horas minus, ope gummi glutinosi, microscopio fuerat oppositus, non solum viveret, sed & ejus corpus tam stricte manebat expansum, acsi recens ex ovo fuisset exclusus.

Quando vermibus 30. horas microscopio fuerat oppositus, & adhuc admodum erat vividus, mihi videre persuasi ejus corpus non tam rigide esse expansum, & consequenter aliquantulum humoris ex corpore ejus exhalatum esse.

Hunc vermibus postea saepe inspexi, & cum per 64. horas microscopio
